### **DETAILED ACTION**

Applicants' arguments, filed 26 November 2002, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application. Claims 1-3 are currently pending.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are directed toward a method to produce DNA. However, the nowhere in the final step is DNA produced, unless the DNA produced is referring to the fragments generated. Clarification is requested.

In claim 1, step (1), it is not clear whether or not the designed partial sequences are used in the design of the oligomers or are the designed sequences the actual oligomers that will be used in later steps. Please clarify the substeps of designing versus preparing oligomers.
